The European Society of Cardiology (ESC) clinical practice guideline for the management of acute coronary syndromes in patients presenting without persistent ST-segment elevation was updated in 2020.1 Here, we highlight and discuss some of the notable changes (table 1) focusing on the diagnostic pathway, decision-making regarding coronary imaging and optimal antithrombotic strategy.

The 2020 European Society of Cardiology non-ST-segment ...

Acute coronary syndrome is a syndrome due to decreased blood flow in the coronary arteries such that part of the heart muscle is unable to function properly or dies. The most common symptom is chest pain, often radiating to the left shoulder or angle of the jaw, crushing, central and associated with nausea and sweating. Many people with acute coronary syndromes present with symptoms other than chest pain, particularly women, older patients, and patients with diabetes mellitus. Acute coronary syn

Acute coronary syndrome - Wikipedia

Overview. Acute coronary syndromes encompass a spectrum of conditions which include unstable angina, and myocardial infarction with or without ST-segment elevation. Patients with different acute coronary syndromes may present similarly; definitive diagnosis is made on the basis of clinical presentation, ECG changes, and measurement of biochemical cardiac markers.

Using an easy-to-understand, step-by-step approach, The 12-Lead ECG in Acute Coronary Syndromes describes how to accurately interpret 12-lead ECGs for effective recognition and treatment of patients experiencing ACS. This 3rd edition simplifies learning with a new three-step method for interpreting 12-lead ECGs, first exposing you to new information, then offering examples, and finally asking you to apply your knowledge.

The 12-Lead ECG in Acute Coronary Syndromes - Text and ...

Obstructive coronary disease with acute coronary syndrome or widespread myocardial scarring is causative in perhaps 80% of cases of out of hospital cardiac arrest, the remainder having non-ischaemic or non-cardiac causes.41 Acute myocardial infarction is responsible for most cases and carries a high mortality; UK data for 2002-10 showed that death before reaching hospital occurs in nearly 25% of cases, constituting 70% of the total attributable mortality.2 Observational studies confirm that ...

Acute Coronary Syndromes, Third Edition - Topol, Eric J. ...

Acute coronary syndrome is a term used to describe a range of conditions associated with sudden, reduced blood flow to the heart. One such condition is a heart attack (myocardial infarction) — when cell death results in damaged or destroyed heart tissue. Even when acute coronary syndrome causes no cell death, the reduced blood flow changes how your heart works and is a sign of a high risk of heart attack.
