Left of Bang is a book for any professional in the law enforcement, security, or military fields. It looks at six topics dealing with human behavior and breaks them down, taking the reader on a journey of situational awareness exploration, lending vocabulary to what many of us previously could only express with the phrase "gut feeling."

The term Left of Bang refers to the attack timeline where Bang (in the middle) is the attack. Everything to the left of it is what precedes the attack, and what's on the right is what follows. Left of/before the attack is the time for proactive prevention. Right of/after the attack begins is when reactive countermeasures take place.

The time to the right of bang is all reactionary. To the right of bang, all we can do is respond to the event as best we can with the skills and tools we have at our disposal. To the left of bang, is all of the information we could have used to either prepare, or remove ourselves from harms' way. If we are serious about self-defense. If we want to prevent, prepare for, or escape from terrible events before they happen. We want to focus on the left side of bang.

Noncommissioned officers stand as the backbone of the United States Marine Corps. The Corps is among the most lasting institutions in America, though few understand what makes it so strong and how that understanding can be applied effectively in today's world. In this insightful and thoroughly researched book, Julia Dye explores the cadre of noncommissioned officers that make up the Marine Corps' system of small-unit leadership. To help us better understand what makes these extraordinary men and women such effective leaders, Dye examines the fourteen leadership traits embraced by every NCO. These qualities—including judgment, enthusiasm, determination, bearing, and unselfishness—are exemplified by men like Terry Anderson, the former Marine sergeant who spent nearly seven years as a hostage in Beirut, John Basilone, the hero of the Pacific, and many others. To assemble this extraordinary chronicle, Julia Dye interviewed Anderson and dozens of other Marines, mining a rich trove of historical and modern NCO heroes that comprise the Marine Corps' astonishing legacy, from its founding in 1775 to the present day.

In a civilized society, violence is rarely the answer. But when it is-it's the only answer. The sound of breaking glass downstairs in the middle of the night. The words, "Move and you die." The hands on your child, or the knife to your throat. In this essential book, self-protection expert and former military intelligence officer Tim Larkin changes the way we think about violence in order to save our lives. By deconstructing our assumptions about violence-its morality, its function in modern society, how it actually works-Larkin unlocks the shackles of our own taboos and arms us with what we need to know to prevent, prepare for, and survive the unthinkable event of life-or-death violence. Through a series of harrowing true-life stories, Larkin demonstrates that violence is a tool equally effective in the hands of
