Light travels as transverse waves and faster than sound. It can be reflected, refracted and dispersed. Ray diagrams show what happens to light in mirrors and lenses.

696 CHAPTER 24

Waves, Sound,
and Light

Seismic waves
move through the
ground during an
earthquake. Some

Get Free Sound And Light

of these waves
are
compressional,
and others are
transverse. The
seismic waves
that cause most
damage to
buildings are a
kind of rolling
waves. These
rolling waves
are a
combination of
